

*Hilker*  
1888

German Royal Experience

EXCLUSIVELY FOR SLEEP COUNTRY MALAYSIA

Back in 1888, a young and talented entrepreneur by the name of Ernst Hilker started a small furniture business that manufactures first class designer pieces in Detmold, Germany.

Today, over a century and four generations later, the company has flourished and expanded to become a recognised and respected premier chain.

**1888**

Hilker was founded by Ernst Hilker the first in Detmold, Germany from a small furniture business that supplies doors, windows and single pieces of furniture.

**1933**

Hilker expanded the business from furniture to home including mattress manufacturing with the same focus on excellent quality, reliability and modern design

**2000**

Hilker is now aiming to use the past experience across four generations to shape a better future with more global presence

**1904**

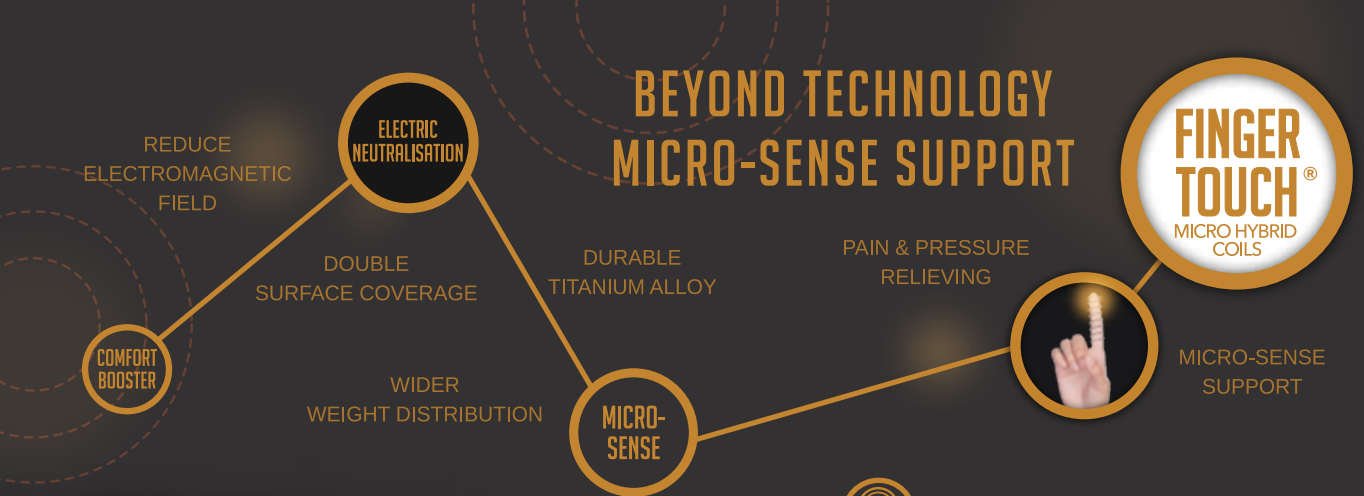

The company grew to become the pioneer of furniture industry in Germany with Royal awards and certificates when Ernest Hilker the second took over in 1920s.

**1962**

Besides the tremendous love for detail, the current brand owner - Ernst Hilker the fourth also emphasises on ecological and sustainable production.

# BEYOND TECHNOLOGY MICRO-SENSE SUPPORT

Standard Pocketed  
Spring Coils  
(110-200mm height)

**FINGER TOUCH®**  
Micro Hybrid Coils  
(60mm height)

DOUBLE  
SURFACE  
COVERAGE

## MICRO-SENSE SUPPORT

Inspired by the concept of therapeutic massage that has been used for years as a way to relieve muscle tension and to relax the body and mind.

## ELECTRIC NEUTRALISATION

Made from Titanium Alloy, which is widely known as an alternative medicine to nullify the negative charges that formed by electromagnetic field.

## COMFORT BOOSTER

The size of Hilker's FINGER TOUCH® Micro Hybrid Coil is approximately half of a standard pocketed spring coil hence it offers a double surface coverage.

**Ti<sub>core</sub>**  
HEAT TREATED TITANIUM

## CERTIFIED HEAT TREATED TITANIUM SPRING COIL

- Very reactive metal, remarkable corrosion resistance;
- Widely known to possess positive charge;
- Neutralises electric field, the negative charges;
- Relieves our body ache which resulted by negative charges;
- More durable as compared to standard metal alloy;
- Longer-lifespan performance.

\*All HILKER spring mattresses are using Heat Treated Titanium Pocketed Spring Coils

# TITANIUM QuadHD Coil®

## 4 LAYERS OF FINGER TOUCH® COILS

Hilker QuadHD Coil® Pocketed Spring Coil System is a global breakthrough sleeping technology that offers you the most prestigious and finest comfort support.

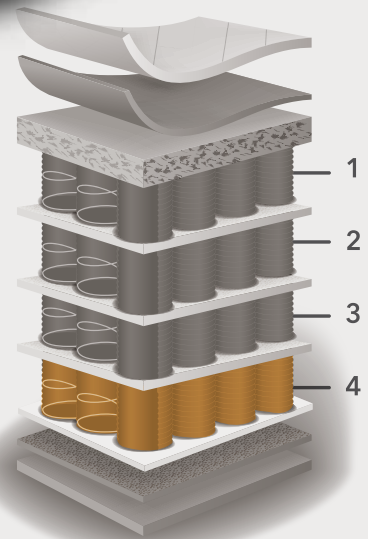

It is constructed by 4 layers of FINGER TOUCH® Micro Hybrid Coils with the combination of both parallel and honeycomb structural design, giving you a total up to 10,000 spring count luxury sleep.

## A STANDARD SPRING COUNT

The minimum spring count for a superior mattress is around 600 but some of the ordinary mattresses only come with 350-400 spring count.

## THE INCREDIBLE FORMULA

- 4 layers of FINGER TOUCH® Micro Hybrid Coils
- Top 3 layers are in parallel designed system
- Bottom layer is in honeycomb designed system
- Giving you a total up to 10,000 spring count luxury sleep
- About 28 times more spring count than the ordinary mattress
- 28 times more comfortable precise support

- 1: 1st-layer Parallel Designed
- 2: 2nd-layer Parallel Designed
- 3: 3rd-layer Parallel Designed
- 4: 4th-layer Honeycomb Designed

**TriHDCoil®**

The structure design of TriHDCoil® Pocketed Spring Coil System provides you 20 times more comfort in comparison to conventional mattresses but offers 3 times less partner disturbance as they response to pressures independently.

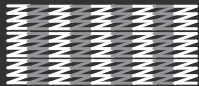

**DuoHDCoil®**

Our duo-layer high-density pocketed spring coil system is offering you 5 times more spring count as compared to conventional mattresses thus giving you 5 times more body support and comfort sleep at night.

## POCKETED SPRING COIL SYSTEM

### Why Pocketed Spring Coil System?

VERSUS

**TRADITIONAL  
SPRING SYSTEM**

- Interlock structure between the spring coils
- Causes more friction hence more noises
- Less durable due to damage from high friction

**POCKETED SPRING  
COIL SYSTEM**

- Individual support of pocketed spring coil
- Isolated movement among the coils
- Hence, less noise and more durable

### Which type of Spring Coil System?

**PARALLEL  
DESIGNED SYSTEM**

- More bouncy with the parallel structure
- Feel softer due to the same alignment between coils
- Hence, higher resilience and bouncier

**HONEYCOMB  
DESIGNED SYSTEM**

- More flexible movement with the staggered structure
- Feel firmer due to lower gap space between coils
- Hence, higher strength and more resistance

# REVOLUTIONARY MEMORY FOAM

---

**NASA**-Technology

## WEIGHT & TEMPERATURE RESPONSIVE

First designed in the mid-1960s for NASA airplane seats, Memory Foam is made from a substance called Viscoelastic that is soft, highly energy absorbance, also extremely responsive to weight and temperature.

## HIGH RESILIENCE & DURABLE

It moulds to your body in response to the heat and pressure, evenly distributing body weight then returns to its original shape once you remove the pressure. Hence, it has a standard durable long lifespan.

## VISCOELASTIC PRESSURE RELIEVING

When you lie on the memory foam, the heat from your body softens it in appropriate points, helps to support your body along the curves and natural lines thus relieve pain and promotes restful sleep at night.

## ECOLOGICAL PRODUCTION

Hilker endorsed the most environmentally-friendly policies and procedures to provides the most ecological and sustainable products to the customers and safe guarding the well being of all human.

## 7-ZONE PRESSURE RELIEVING

Dedicated firmness and density design according to the 7 comfort zones of human body from head, neck, shoulder, waist, hip, leg and feet, provides you a more customised pressure relieving support.

## 100% NATURAL LATEX

Natural latex is tapped from the *Havea Brasiliensis* rubber tree on carefully selected plantations near the equator. LATEXCO uses the highest quality natural latex in the industry for all cores and toppers.

## BREATHABLE PIN-HOLES

Temperature Regulation

Latex foam has an open cell structure made up of millions of tiny interconnecting microscopic air bubbles. Besides elasticity and resiliency, the exclusive knobs and pin-holes design also promotes constant air circulation and adaptive to heat and surrounded moisture level.

## HYPO-ALLERGENIC

Anti-dustmite • Anti-bacterial

Natural latex is planet friendly biodegradable material, also naturally hypo-allergenic, dust mite resistant, and will not support mildew or bacteria. Thus, it is very suitable for skin sensitive sufferers.

**QUICK  
DRYING**

The special hydrophility feature disperses moisture over a larger surface so it dries easier.

**ANTI-STATIC  
ANTI-STRESS**

Prevents static build up on fibres hence relieving body stress and gives a more comfortable sleeping environment.

**PERFECT  
TOUCH**

Provides superior soft feel with more supple and flowing as compared to regular polyester fabrics.

**EASY TO  
CLEAN**

A protective layer forms between the mattress ticking fibres to keep fabric dirt free easily.

TURKEY TECHNOLOGY

SMART FACE  
POLYESTER FABRIC

The Q-Dry&Soft smart face polyester fabric is developed by Turkey technology, and has put an end to the traditional polyester by enjoying a perfect hydrophilicity and soft touch.

This flawless fabric has transformed the apparent disadvantages like the rough touch and low absorption features of polyester. It is all the convincing you need for this superior quality and ultimate comfort sleep fibre.

DO YOU KNOW  
THE DIFFERENCE?

PILLOW TOP

Pillow Top is a layer of fillings that provide a sumptuous cushioning on top of the mattresses. It is a very soft-feeling surface that gives you extra comfort.

Firmness	●
Softness	● ● ●

PLUSH TOP

Plush is generally firmer than Pillow, but less firmer than Box. It usually embedded in the top part of a mattress. Combination of both Pillow and Plush gives you a luxurious comfort.

Firmness	● ●
Softness	●

BOX TOP

Box Top or Euro Top is very similar to Pillow Top. They are both feeling soft and tender. Only difference would be the outlook, where Box is usually sewn to create a flush, uniform appearance.

Firmness	●

WHAT IS DUSTMITE?

Dustmites, or bed mites are the most common cause of allergy from house dust. Dustmites live and multiply easily in warm, humid places. They float into the air when anyone vacuums, walks on a carpet or disturbs the bedding, and finally settle on your pillows and mattresses once the disturbance is over.

Good to know, all Hilker's mattresses are equipped with Anti-dustmite feature that comes from both Natural Latex and the High-density Foam. Hence, it is very suitable for skin allergy and asthma sufferers.

YOUR MATTRESS IS A HOTBED OF BACTERIA

Dustmites are not the only things hiding in your mattress. Due to our warm body temperature, mattresses are the perfect place for bacteria to thrive and spread. Thus, it is crucial to get yourself a good quality mattress that comes with Anti-bacterial function.

FAQ 1:

Which is the best mattress that I should buy?

When it comes to mattresses, there is no “one-size-fits-all” solution. As the needs vary across individuals, what is best for them would be really subjective according to each individual’s preference.

To determine the mattress that is best for you, we highly recommend that you to refer to our buying guide or visit to our nearest outlet for the face-to-face consultant. All Hilker mattresses are crafted with care and tested for quality assurance.

FAQ 2:

What should people look for in a new mattress?

Four keys to keep in mind are support, comfort, space and matching sets. The mattress that's right for you will keep your spine in proper alignment – how your spine is when it's in good standing posture–supporting your body and cradling it along its curves. The right mattress will also be comfortable for your body.

Keep in mind that your comfort preferences are likely to change as you age. Make sure the mattress provides enough space for easy, free movement.

FAQ 3:

Does your bed generate heat? How can I control the heat?

We have faced several questions regarding heat. Different body chemistries react differently. Our sleep systems will generate some heat but this is due to the fact that our systems conform to your body and you tend to sleep longer in one position without adjustment, which somehow is best for you. In this case, you may use a lighter bed linen to wick away moisture.

FAQ 4:

How often should I rotate my mattress?

Our recommendation is once every three weeks for the first 3 months of ownership. Rotating your mattress allows the cushioning and insulation materials to be properly distributed, providing maximum comfort and longevity. Please refer to your Mattress Care Guidance, which can be found in the Product Guarantee Booklet upon purchase.

FAQ 5:

How much body impression should I expect on the surface of my mattress?

Body impression less than 3cm is considered normal and desirable in luxury mattresses. Our mattresses are designed to conform to your body over time while still delivering correct postural support.

FAQ 6:

I have purchased my bed a few months and it has already formed body impression. Will it get worsen over time?

Materials in your sleep system will settle most within the first weeks of ownership. You should expect some degree of body signature, but deeper impressions should not occur. If they do, please contact the customer service department of Harvey Norman Malaysia.

# OUR ASSURANCE

## PURVEYOR FOR COURT IN 1906

Hilker has been manufacturing renowned, high quality furnitures since 1888 in Germany. One of the earliest recognition we have received is the honourable “Purveyor for Court” award back in 1906 by the German Royal Family.

This award is only granted to businesses who provide services of goods to the royal court, which symbolises the exclusiveness and prestigious of owning a Hilker. It is truly for the royal highness.

## SGS CERTIFIED TITANIUM TEST

SGS is the world leader in all materials, components and products testing with over 130 years of experience.

It consists of global network laboratories and testing facilities, staffed by knowledgeable and experienced personnel, reducing risks, shorten time to market and demonstrating the quality and safety of materials, components or products before launching to the market.

## CONFIDENCE IN TEXTILES

OEKO-TEX® Standard 100 with its label “Confidence in Textiles” is the most well-known and most widespread independant global testing and accreditation scheme for the screening of harmful substances within consumer textiles.

All products with this label offer extensive safety of consumption, also assuring the sustainable conditions throughout the manufacturing process.

## 10-YEAR GUARANTEE

Visit our official website at

[www.hilker1888mattress.com](http://www.hilker1888mattress.com)

to find out more on the terms and conditions.

## euroLATEX ECO STANDARD

euroLATEX is the representative body of all major European producers of latex foam components for the bedding and the upholstered furniture industry. The association was founded in 1990 by eight members to act as an intermediary between the industry and the EU authorities.

All our latex components are supplied by Belgium LATEXCO with the accreditation of this global euroLATEX ECO standard.

## LGA CERTIFICATION by TÜV Rheinland AG

LGA Certification is administered by TÜV Rheinland AG, a global provider of technical, safety, and certification services with headquarters in Cologne, Germany. The test checks the compliance of the mattress with DIN EN 1957 standard. DIN EN 1957 standard deals with functional performance for domestic use of a mattress.

It distinguishes first-class products that really fulfill their actual purpose.

## Eco-INSTITUT CERTIFICATION

Products bearing the Eco-INSTITUT certification are products you can use in your home with confidence that they do not contain even trace amounts of hazardous chemicals and will not produce foul, unhealthy off gassing in your home.

These are important considerations for many families especially on bedding products and it can make a world of difference to your pleasure in your new purchase.

The family crest arose after being honoured the "Purveyor for Court" award in 1906 by the German Royal Family. It reflects the prevision and reliability of the Hilker brand. The oak tree represents the basic material used in our furniture whilst the tools on either side represents our excellent craftsmanship.
